

REDESIGNED

Chest Belt

Our redesigned Chest Belt features a new, more comfortable, low-profile end-tab, making it easier to use!

For users with limited hand function, or who prefer chest support without a buckle, our Chest Belt is now a better option than ever. Upgraded strong, smooth hook-and-loop material won't trap dirt.

Like other Bodypoint supports, the Chest Belt can be machine-washed and dried, using hot water up to 60°C /140°F.
